

CENTRAL NPS OFFICE · 2026

NPS Transformation.

From a static, retrospective survey to a **dynamic, real-time feedback system** built around the rhythm of the term.

01 **Relevance**

Students answer only for what they actually experienced — no contaminated data, no fatigue.

02 **Responsiveness**

Issues are surfaced inside the term, when correction is still possible — not after the fact.

03 **Differentiation**

Active and service departments are measured on the engagement model that fits how they actually operate.

Why the legacy system had to go.

Each gap compounded the others. Low quality + late signal + no granularity = feedback that cannot drive improvement.

GAP 01

80%

IRRELEVANT FEEDBACK

Survey Fatigue

Students rated all courses regardless of enrolment — contaminated data, random responses, eroded trust in the process.

GAP 02

0

IN-TERM FIXES POSSIBLE

No Real-Time Response

All feedback arrived after the term closed. Issues identified could never benefit the cohort that surfaced them.

GAP 03

1

DATA POINT PER TERM

Poor Granularity

A single end-of-term snapshot offered zero visibility into performance trends, recovery, or trajectory.

GAP 04

1

MODEL FOR ALL DEPTS

No Differentiation

Lecture-heavy and service departments assessed identically, despite fundamentally different engagement models.

GAP 05

2

INCOMPATIBLE PIPELINES

Data Silos

Outclass operated on separate forms with incompatible formats, blocking unified analysis and cross-dept comparison.

A three-tier, timing-aware system.

Feedback is layered across the term. Tier 1 catches issues early. Tier 2 differentiates active and passive departments. Tier 3 captures the integrated experience.

Old vs. new.

WORKED EXAMPLE · STUDENT IN 4 OF 12 COURSES

Legacy: 20 requests · 16 (80%) irrelevant

New: 4 forms · 32–40 questions · 100% relevant

DIMENSION	LEGACY SYSTEM	NEW SYSTEM
Feedback Frequency	Per-session (Academics only) + single term-end survey	Sessions1, 2, 5+ mid-termF&C / Pulse+ FinalNPS
Relevance Filtering	None — students rated all courses regardless of enrolment	Complete— F&C only for enrolled and completed courses
Real-Time Action	Impossible — feedback arrived after term conclusion	Enabled— in-term corrections at S1, S2, S5 and mid-term
Dept. Differentiation	One-size-fits-all approach for all departments	F&Cfor active depts;Pulsefor passive service depts
Data Integration	Fragmented — Outclass separate, incompatible formats	Unified— all departments in a single integrated framework
Granularity	Course-level aggregation only; single data point	Lecture-specific (T1) + course-level (T2) + holistic (T3)
Student Experience	Survey fatigue — perceived as bureaucratic burden	Targeted, proportional— perceived as respect for student time

What this unlocks.

From reporting function to strategic partner — the Central NPS Office gains the visibility, cadence, and credibility to drive institutional excellence.

5×

FEEDBACK RELEVANCE

20% → 100% relevance rate.
Every question lands on lived experience.

3

IN-COURSE INTERVENTIONS

Session 1 · Session 2 · Session 5.
Three windows to course-correct.

100%

UNIFIED FRAMEWORK

All departments — including
previously siloed Outclass.

OUTCOME 01

Student Experience

Proportional, relevant feedback only. Perception shifts from bureaucratic burden to meaningful input. Visible in-term corrections build trust.

OUTCOME 02

Data Quality

Every data point reflects real experience. Trend analysis, intervention validation, and predictive signals all become possible.

OUTCOME 03

Operational Reach

Structured touchpoints create natural intervention moments within the term. Faculty receive timely feedback and can demonstrate responsiveness.

OUTCOME 04

Leadership Clarity

Multi-tier visibility — granular lecture-level detail plus holistic institutional view. Supports evidence-based resource allocation.

OUTCOME 05

Long-Term Impact

Continuous-improvement culture replaces crisis response. Scalable framework accommodates growth without proportional admin burden.

LEARN BY DOING

The Central NPS Office moves from a reporting function to a strategic partner in institutional excellence.
